PERSONAL PROJECTS

Online Restaurant Management System
 (06/2022 - 10/2022)
- It is an web application in which the customer can place their order based on their interests in advance by giving their details. This application helps to reduce the waiting time of customer at restaurant for food. Customer can also cancel their order prior to the dining day.
- Tech Used: **HTML, CSS, JavaScript, Bootstrap, PHP, MySql.**

TO-DO List (10/2022 - 11/2022)
- It is an application specially built to keep track of errands or tasks that need to be done . This application will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks they can also remove them from the list.
- Tech Used: **ReactJs, Firebase.**
- Netlify Deployment Link: 🔗

CodePen (01/2023 - 01/2023)
- CodePen allows you to write code in the browser, and see the results of it as you build . A useful and liberating online code editor for developers of any skill, and particularly empowering for people learning to code.
- Tech Used: **ReactJs.**
- Netlify Deployment Link: 🔗
